Introduction

NUMBER and ALGEBRA

Chapter 1 - Whole Numbers

Basic Facts 1	4
Basic Facts 2	5
Strategies + and -	6
More Strategies + and -	7
Paperwork + and -	8
Adding - Carrying	9
Subtracting - Decomposition	10
Multiplication Facts	11
Multiplication Strategies 1	12
Multiplication Strategies 2	13
Multiplication Strategies 3	14
Understanding Division	15
Division Strategies	16
Estimating \times and \div	17
Multiplying - Paperwork	18
Dividing - Paperwork	19
Solving Problems 1	20
Solving Problems 2	21
Solving Problems 3	22
Whole Numbers - Test	23

Chapter 2 - Number Facts

Special Numbers	24
Divisibility Testing	25
Powers	26
A Product of Prime Factors	27
Negative Numbers	28
Integer Arithmetic	29
Number Problems	30
Order of Operations	31
Number Sentences	32
Number Facts - Test	33

Chapter 3 - Decimals

Decimal Place Values	34
Ordering Decimals	35
Mental + and -	36
Paperwork + and -	37
Basic Strategies \times and \div	38
More Strategies \times and \div	39
Paperwork \times and \div	40
Using a Calculator	41
Decimal Problems 1	42
Decimal Problems 2	43
Decimal Problems 3	44
Decimals - Test	45

Chapter 4 - Fractions

Understanding Fractions	46
Comparing Fractions	47
Using Fractions 1	48
Using Fractions 2	49
Using Fractions 3	50
Fractions and Decimals	51
Mixed Numbers	52
Fractions and Division	53
Percentages	54
Percentages on a Numberline	55
Solving Problems 1	56
Solving Problems 2	57
Fractions - Test	58

Chapter 5 - Algebra

Patterns	59
Relations	60
Variables	61
Writing a Rule 1	62
Writing a Rule 2	63
Find the Number	64
Properties of \times and \div	65
Algebra Problems 1	66
Algebra Problems 2	67
Co-ordinates	68
Plotting Graphs	69
Reading Graphs	70
Algebra - Test	71

Chapter 6 - Number and Algebra

Task 1 - An Investigation Into Travel Costs	72
Task 2 - Emily's Birthday	73
Task 3 - Dots As Numbers	74
Task 4 - Up the Garden Path	75

GEOMETRY and MEASUREMENT

Chapter 7 - Measurement

Capacity	76
Mass	77
Length	78
Metric Unit Conversions	79
Using Metric Units	80
Scales	81
Time	82
Time Problems	83

Introduction

Chapter 7 - continued

Rates	84
Measurement Problems 1	85
Measurement Problems 2	86
Perimeter and Area 1	87
Perimeter and Area 2	88
Volume	89
Perimeter, Area, Volume Problems 1	90
Perimeter, Area, Volume Problems 2	91
Measurement - Test	92

Chapter 8 - Geometry

Vocabulary	93
Angles 1	94
Angles 2	95
Compass Directions	96
Constructions	97
Solids	98
Views and Cross Sections	99
Views of Stacked Cubes	100
Translation	101
Reflection	102
Rotation	103
Symmetry	104
Enlargement	105
Tessellations	106
Geometry - Test	107

Chapter 9 - Measurement and Geometry

Task 1 - Redecorating Your Room	108
Task 2 - Running At Top Speed	109
Task 3 - The Same, But Different	110
Task 4 - A Square Design	111

STATISTICS

Chapter 10 - Statistics

Starting an Investigation	112
Data Display 1	113
Data Display 2	114
Data Display 3	115
Data Display 4	116
Average and Range	117
Organising and Analysing 1	118
Organising and Analysing 2	119
Organising and Analysing 3	120
An Investigation	121-122

Chapter 10 - continued

Evaluating a Survey	123
Chance	124
Experiments 1	125
Experiments 2	126
Statistics - Test	127
A Statistical Investigation	128-129
An Experiment Involving Chance	130

Removable Answers (perforated)back pages A1-A10

Note to Teachers and Parents

The Dragon Maths series includes appropriate work for the strands Number and Algebra, Geometry and Measurement, and Statistics from the *New Zealand Mathematics and Statistics Curriculum*.

There are four chapters covering number skills. This reflects the time pupils should spend learning numeracy strategies as suggested in *The Number Framework*.

Dragon Maths 5 is written for the majority of pupils in Year 7. It covers curriculum level 3-4 and the Multiplicative Stage (stages 6-7) of The Number Framework.

The chapters in this book follow the order of the curriculum document but it is not suggested that the work be done in this order. Teachers may wish to break up the number chapters. A possible working order may be : Whole Numbers, Number Facts, Geometry, Decimals, Fractions, Algebra, Measurement, Statistics.

Once a chapter has been completed the skills learnt need to be practised regularly for the remainder of the year.

On the top of each page you will find the feedback icons :

These are provided for pupils to let their teacher know how well they've managed the work on that page. Encourage your pupils to colour the icon that most closely reflects how they are coping and you will have a valuable window on their attitude towards this maths topic.

I hope you and your students have fun working through Dragon Maths 5 this year. Remember this workbook is part of a full primary maths series and able students, together with remedial students, may benefit from working either one book higher or lower in the series.
